AI NOTE-TAKERS TODAY

The trade-offs so far

Names come from a calendar invite	**Fireflies, Granola, Circleback**
You label every voice by hand	**Limitless, Fieldy**
Strangers stay "Speaker 2"	**Plaud, Granola on iPhone**
One language per recording	**Otter, Plaud**

From each vendor's own help pages, read 2025–2026; quotes and dates in demo/competitors/landscape.md.

WHY THE ROOM

The room already says who everyone is

People **introduce themselves**, say what they'll **send**, and tell each other **what they want**, in their own language

One phone on one chest hears the whole table

MARGAUX, TO ERIC

"Margaux Lefèvre, Corvane Capital."

→ A **person**, with no card: Chloé's colleague, met Oct 23

MARGAUX, TO JULIEN

"Une page, avec des chiffres." One page, with numbers.

→ An **edge**: your deck, rebuilt as one page, numbers first

ERIC, TO LEO

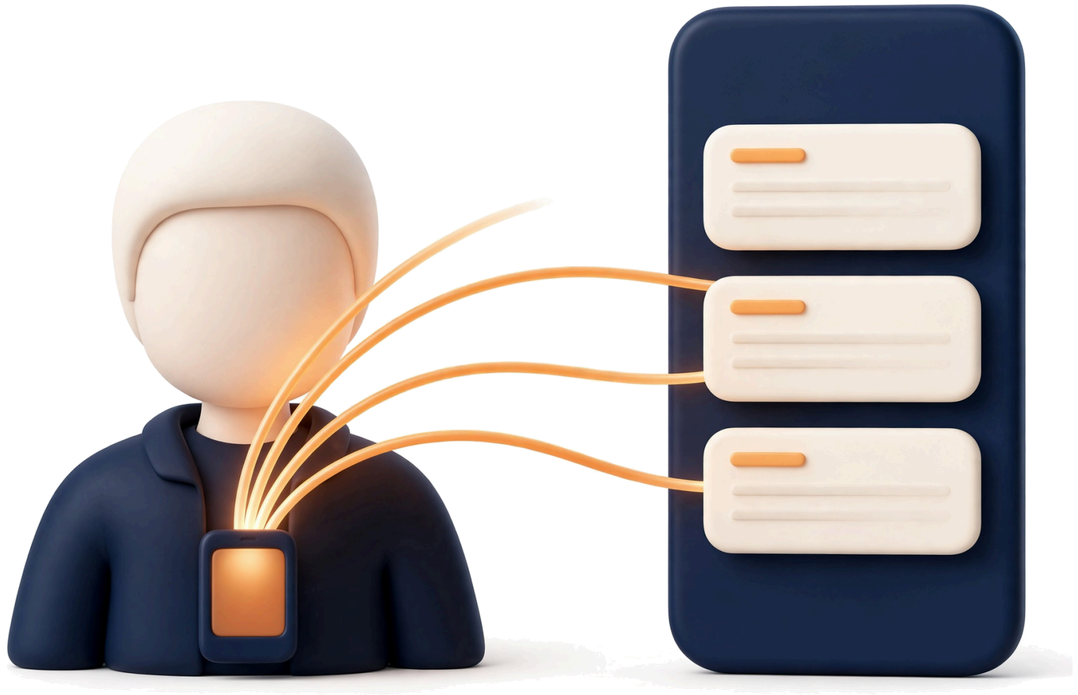

"I'll send you our deck tonight."

→ A **promise**, due tonight, drafted for you

HOW IT WORKS

Nothing to type

Meta's models listen; **our code** checks every answer

iPhone on the chest
4-channel spatial audio

What arrives on your phone
ready before you get home

OUR CODE

Your own voice
found from above the badge

Names you know
sent as hints

META MODELS

Muse Voice Transcribe
every voice apart, live

Muse Spark
people, promises, drafts, search

Muse Spark Open · Baseten
what wasn't said to you

SAM 3.1
every face in one photo

CHECKED, THEN DONE

Quotes, links and numbers
must exist in the source

Follow-ups · one page · introductions
ready before you get home

FOUR SOLUTIONS, ALL IN ONE

Every conversation becomes what comes next

Names from the introduction	no invite, no labelling
What wasn't said to you, in any language	the deck, rebuilt
Met before, across evenings	in 0.8 s, with no model
Introductions worth making	and where to meet next week

Your deck, rebuilt as **one page, numbers first**

Illustrations: Muse Image

WHY NOW

The big companies bought memory of your day

2

wearables that remember your day, bought

Amazon bought Bee (Jul 2025); Meta bought Limitless (Dec 2025)

410

Limitless users asked for a personal CRM

still unbuilt when Meta bought it (feature board, Dec 8, 2025)

183

AI note-takers on Product Hunt

at a mixer, you are still talking to "Speaker 2" (Oct 2026)

BUILT AT THE EVENT

One person, nine days

0.8s
introduction to **"met before"**

24/25
names right across 12 accents

3–5s
per **edge-finder** pass, Spark Open

259
server tests
